OBJECTIVE

Seeking a summer internship to apply and expand my knowledge of FullStack and DevOps in practical settings. Eager to contribute to meaningful projects while gaining hands-on experience and refining my skills. As I am passionate about innovation and driven to learn, I aim to deepen my understanding of real-world applications, positioning myself for a successful career in the industry. Committed to continuous growth and excellence, I am ready to tackle challenges and explore emerging technologies in the field of AI, FullStack and DevOps, and Computer Vision.

SKILLS

DEVELOPMENT	HTML, Tailwind-CSS, JavaScript, ReactJS, NodeJs, Java, MySQL
DevOps	AWS, Google Cloud, Networking, Docker, Kubernetes
TOOLS	GitHub, VSCode, CursorAI

EDUCATION

Bachelor of Technology in CSE , DIT University CGPA: 8.0 (till 5th semester) Relevant Coursework: Full-Stack and DevOps.	2022 - Expected 2026
Senior Secondary (12) , Silver Oak School, Alwar Grade: 86% Relevant Coursework: Physics, Chemistry, Math	2021 - 2022
Secondary (10) , Silver Oak School, Alwar Grade: 92%	2019 - 2020

ACADEMIC EXPERIENCE

Technical Team Microsoft X DIT Club	2024 - 2025 <i>DIT Univeristy, Dehradun</i>
<ul style="list-style-type: none">Achieved 100% growth in my technical skills in various skills.Led and held various workshops regarding upcoming technologies and innovations.	
Technical and Stagging Comettie ISED International Conference	2023 <i>DIT Univeristy, Dehradun</i>
<ul style="list-style-type: none">Achieved growth in my technical skills, Organising skills, and Event Hosting.It was a 3-day conference that boosted my confidence in hosting and managing an event.	

PROJECTS

Uber-Clone. (In Progress.)
<ul style="list-style-type: none">Developing a responsive UBER website utilizing the MERN stack. It is a complete project that consists of a frontend and a backend.Developing this project will make me proficient in React learning and MERN StackTech Use: MongoDB, Express, ReactJS, Node
Virtual_Profile and Cloud Deployment. (Check it here)
<ul style="list-style-type: none">The task was to create virtual profiles and connect them internally so that they can communicate and share data over the cloud.

- The idea was to make Containers of virtual profiles like nginx and many more.
- I create virtual machines, containerize them, and deploy them over AWS. During my Development and Operation learning, it was my project.
- Tech Use: AWS, Docker, Ubuntu, Bash and VMWare

Uifry-landingPage. (Try it here)

- Developed a responsive website utilizing the VITE.JS + ReactJs framework of JavaScript.
- This project enhanced my learning on JS frameworks.
- Tech Use: Vite, React, CSS, JSX.

Animated Website using JSAP. (Try it here)

- Developed a responsive animated website utilizing the GSAP (GreenSock Animation Platform) library for smooth transitions and interactions.
- Deployed the project on a live server, utilizing Git for version control throughout the development process
- Tech Use: GSAP, JavaScript, Tailwind, HTML.

PortFolio-Website. (Try it here)

- Developed a responsive portfolio website to express myself.
- This was the basic portfolio website consisting of basic techstack and made as a learning project.
- Tech Use: Tailwind-CSS, HTML.

ACADEMIC ACHIEVEMENTS

- Certification by ISRO on participating in course on Cyber Security.
- Certification by Google AI Essentials by Google.
- Certification by Basics of Cisco Networking by LearnQuest.
- Certification by Python for DataScience, AI and Development by IBM.
- Certification by Introduction to container w/ Docker, Kubernetes, and OpenShift by IBM.
- Certification by Introduction to Software Engineering by IBM.
- Certification by Introduction to Relational Database by IBM.
